We at Hub Construction pride ourselves for being punctual and never letting the client down. With working with Gibson Heating and specifically Geoff Gibson over a long period now, it has to be noted that Geoff and his team have the same attitude to work as ourselves. They always turn up when they say they are, they are punctual and courteous. They are extremely clean and tidy workers. Whenever I have needed to contact Geoff whether for an Emergency or otherwise he always answers his phone and tries his utmost to help. Recently I received a call AT 8am from a very good client of mine when I was abroad, she had a leak coming thro in her kitchen ceiling, and I called Geoff immediately and explained my predicament. Geoff was there within 30 minutes and sorted the problem , the client rang me back 3 hours later thanking me and praising Gibson heating for the efficient clean and prompt way they carried out the work. This is not the first time and I am sure it will not be the last time that my clients will be praising Gibson heating. I have no problems recommending Gibson Heating again in the future

Yours

J R Hubbard
